

**Plainfield Water/WasteWater Commission
Special Meeting Minutes for October 1, 2020**

Present In Zoom Session: Tim Phillips, Josh Pitts, Mary Lane, Tristan Macgregor-Stewart, John Merrifield of State Watershed division

1:30PM Meeting called to order

Permit Review by John Merrifield

Regulatory changes are causing changes in the limits of our permit. We will need to deliver cleaner water to the state's waterway.

The phosphorus optimization plan is something we will need, but Greg and Tristan have been working with Elizabeth Walker on that and John thinks we are looking good at this time.

The Commission had no questions beyond explanation of a few acronyms.

Tristan stated the proposed permit was basically what he and Greg had been expecting for the last little while, no surprises.

John explained that the permit would be posed for public comment shortly and probably issued within December of 2020. If the Commission realizes it has a question, please let him know.

The meeting adjourned 1:50PM meeting adjourned
